TESTIMONIALS/ PAST PERFORMANCE

BROOKS QUARRIES has been a large part of the development of the Lockyer region in recent years, supplying quarry materials & earthmoving machinery to the Lockyer Valley Regional Council on a regular basis.

We also have ongoing relations with Rugby Farm & Nolan's Interstate Transport where we have developed large areas of their property.

BROOKS QUARRIES also work for & supplies the smaller farming community & local residences with such services as dam construction, road construction, civil works, house and shed pads to trenching & labour hire.

DIFFERENTIATORS

Our strongest point of difference to our competitors is that we have been in the local area since 1955 and have a strong relationship with the local council & surrounding businesses. We also have all aspects of the earth moving industry covered: making & supplying our own quarry products, transportation of our products, and the equipment knowledge & machines to fulfil all of our customers/clients and contractors requirements.
